TITLE: System and method for facilitating transfer of vehicle leases

Detail Description Paragraph:

[0043] Once the vehicle information is entered at 190, the listing user may then be directed to a web page or series of web pages/screens in order to enter vehicle lease information as indicated at 192. The information entered by the listing user may include the vehicle leasing company, the lease account number, the monthly lease payment, the total miles allowed on the lease, the length of the lease term, the lease end buyout amount, the lease origination date and the lease expiration date. After the vehicle lease information has been entered at step 192, the listing user may be given the option of providing an incentive as indicated at step 194. If the listing user chooses to provide an incentive the listing user may be directed to a page or screen where the incentive may be entered as indicated at 196. After entry of the incentive, or if no incentive is to be offered, the listing user enters credit card information at step 198 to pay a required monetary fee in order to have the vehicle listed on the website. At such time the listing user agrees to all listing and transfer fees and also agrees that the website administrator will act as their agent in the lease transfer transaction. At step 200 the electronic credit card transaction is processed and, if approved, an automated e-mail is sent to the listing user/seller to confirm that the vehicle has been listed and to provide details on what may happen next as indicated at step 202. At 204 the vehicle lease record is added to the website database and the listing is activated at 206. Upon successful completion of the electronic credit card transaction the listing user may also be queried as to whether or not the listing user will continue to be held liable to the vehicle leasing company even after transfer of the vehicle lease to another party. This query is shown at 208 and may be in the form of a simple question presented to the listing user. Alternatively, because vehicle leasing companies typically use standardized agreements, the website may store information regarding continued lessee liability after transfer and may automatically determine whether or not the listing user will continue to be held liable. If the listing user will continue to be held liable the listing user may be directed to a liability insurance link 210 where insurance coverage may be obtained to cover the continued liability as will be explained in further detail below.

Detail Description Paragraph:

[0044] The lease transfer system website may also be set up to allow listing users/sellers and/or searching users/buyers to manage their accounts as will be explained with reference to the process chart 220 of FIG. 7. From the registered users sign in link 104 of the home page a listing user may be provided with options including seller mail box option 222, edit seller data option 224, manage add option 226, and liability insurance link option 210. Via the seller mail box option 222, the listing user may view registered searching user/buyer contact information for any searching user who has indicated an interest in a given vehicle listed by the listing user as indicated at 228. The listing user may also initiate a transfer of a lease for a given vehicle listed by the listing user as indicated at 230. The listing user may be charged a monetary fee via electronic credit card transaction as indicated at 232, 234 in order to initiate the lease transfer. If the credit card transaction is approved an electronic message 236 triggers the website administrator to initiate the lease transfer and an electronic message 238 to the

listing user to confirm that the lease transfer process has been initiated. With regard to electronic message 236, where the lease transfer process is wholly automated this electronic message may simply trigger website software to perform the lease transfer process as will be explained below. Alternatively, where one or more of the lease transfer process steps is conducted manually, this electronic message may be an e-mail to the website administrator.

Detail Description Paragraph:

[0050] If the listing user has requested liability insurance as determined at step 282 the insurance application can be submitted to the insurance company at 284 and the insurance company can generate and complete the policy at 286. In one embodiment such application submission and policy generation may be a fully automated electronic process. At step 288 the necessary lease transfer documents are produced using the information which has been previously provided by both the listing user/seller and the searching user/buyer. Such document preparation may be an automated electronic process or may involve some human intervention. The transfer documents are forwarded to the searching user/buyer and the listing user/seller for review and execution and are then returned to the leasing company at step 290. Where the documents are electronically generated they may be electronically forward to the users, via e-mail or via the website, with the users providing electronic approval/signature to the documents. Alternatively hard copies of the documents may be forwarded to the users for manual signature. Similarly, the executed documents may be forwarded electronically to the leasing company, or hard copies of the documents may be forwarded. At step 292 the vehicle record is marked sold in the vehicle lease database so that future searching users will not unnecessarily waste their time by expressing interest in a vehicle which is no longer available. At step 294 the transfer is shown as completed.
